

なぜまだ使える土器が屋外で たくさん発見されるのだろうか？

Why has so much usable ceramic pottery been found outdoors?

Pottery used for cooking, as well as clay figures and pottery used for prayer from the late Jomon period were discovered on the eastern outskirts of the village. In addition to shards from broken pottery, pieces of pottery that were still usable were also discovered. This is thought to be a place where the Jomon people, who believed gods also resided in pottery, conducted rituals to send (return) tools including used pottery to the gods.
